CAMELLIAS, THE JEWELS OF THE GARDEN,

Portland Camellia Nursery

P. L. VAN DER BOM, Proprietor

SEASON 1952 and 1953

Two Locations:

824 N.E. 102nd Ave.

Mail Address: 3307 N. Williams

Portland, Oregon

Dear Customer:

We offer this catalog in the hopes that it will help you in selecting plants for your gardens and landscapes. We specialize in Camellias and have over 350 varieties to select from. We have one of the finest selections of Rhododendrons available, including the newest varieties. We also have lovely specimen plants of Azaleas.

We have some of the newest ideas out for the use of Camellias. "Espalier Camellias" in all different shapes, sizes and forms. Then we have "Tree Form" and "Umbrella Form" grafted Camellias. We usually have grafted Camellias with different varieties on one plant; but we are all sold out on these this year. We hope to have a nice stock of them next year. We are proud to say that we also have the World's Wonder Camellia" which has over 100 Fall Sasanqua and Japonica varieties grafted on it. This plant starts to bloom in October and blooms until the end of May. This is truly a sight to see.

We have a fine selection of evergreen shrubs listed in our catalog this year. The prices are very reasonable. Also you will find special sale prices listed on many articles.

We send our catalog to prospective customers all over the U.S.A. Many of these flower lovers are unable to visit our Nursery and wish to have their plants shipped to them. We wish to assure these customers that no plant leaves our Nursery that we would not wish to receive ourselves. We guarantee our stock to be true to name, healthy and of the size specified. We may give an oversize plant but never undersize. All plants are balled and burlaped. Every precaution is taken in packing. No extra charge for packing unless notified. We are not responsible for breakage in transit. Claims should be settled with your carrier immediately. Cost of transportation for all shipments is paid by purchaser. We are unable to give Parcel Post rates as they change so often. All orders are shipped as promptly as possible. During the peak season an order may take a little longer but we try to get them shipped within two weeks after receipt of your order. Customer will be notified by Nursery the date shipment is made.

Camellias can safely be grown in temperatures that get no colder than 9° above zero. See pages and for indoor culture.

Please order plants by their name, size, and price. Allow plenty of time for shipping. We accept money orders or check. C.O.D. orders must pay at least 25% of total value before order is shipped. *We do not ship on open accounts.*

Please state if we may substitute an equally good variety or a larger or smaller size if we are sold out on the size or variety you wish.

We can safely ship plants to points all over the U.S.A. from the 15th of October to the end of May. As our flowering shrubs bloom later than the Southern states you can still order during the months of February, March and April and still get budded plants of some varieties of shrubs.

Welcome to all Visitors

MAKE EVERLASTING GIFTS FOR ANY OCCASION

Planting and Care of Camellias, Azaleas and Rhododendrons

HERE ARE A FEW SIMPLE INSTRUCTIONS TO FOLLOW WHEN PLANTING CAMELLIAS, RHODODENDRONS AND AZALEAS, AND HELPFUL HINTS ON THEIR CARE AND MAINTENANCE

1. The best location for planting is governed by your climate. If summer suns are extremely hot for long periods use semi-shaded areas. Allow at least 3 feet space between plant and object. Protect young plants from hot summer sun with lath shade which may be discontinued as plants grow larger. As they grow they get hardier. NOTE—Rhododendrons are classified as to best planting location. Azaleas can be planted 1 to 1½ feet apart or farther, bush form 3 feet apart.

2. These plants are easy to grow with the correct soil. They thrive in loose, loamy soil with good drainage. We attain this soil with the use of peat-moss, rotted vegetation or leaf mold or well-rotted sawdust. Sand may be added in hole before planting to insure good drainage to clay soil.

3. Do not over-fertilize. IF you use well-rotted barnyard fertilizer use only on top of ground. Be sure to keep away from Azaleas as they do not like fertilizers. Never use any fertilizers which contain lime as they are acid loving plants. Any acid fertilizer is good. We use Vigoro with very good results. Sprinkle 1 or 2 handfuls around plant on top of ground. A very large plant could use a little more. We fertilize them twice a year, once in early fall and once in early spring. To maintain an acid soil condition sprinkle 1 cup of Epsom salts on top of the ground around each plant. Be sure to water Vigoro and Epsom Salts into the ground. Use sparingly so that fiber roots on top of ground do not get burned from over-fertilizing.

4. The watering of these plants is very important. The fiber roots grow close to the top of the ground and therefore will dry out if not watered during the dry months of the year. The peat moss you put on top of ground around your plants will help to hold the moisture. All three of these shrubs like water on their foliage. Sprinklers can be turned on them every two or three days in hot weather.

If these maintenance instructions are followed you should have healthy plants with dark green foliage and normal sized blooms. Remember, the care you give your plants will show.

5. **PLANTING INSTRUCTIONS**—LEAVE BURLAP ON PLANT AS IT HOLDS ROOTS TOGETHER AND KEEPS WIND FROM WHIPPING PLANT LOOSE IN GROUND. THIS APPLIES TO ALL SHRUBS. DIG HOLE 8 INCHES LARGER THAN BALL OF PLANT. IF YOUR SOIL IS CLAY, FILL IN BOTTOM OF HOLE WITH SAND FOR DRAINAGE. MIX SOIL AND PEAT MOSS OR ROTTED VEGETATION TOGETHER WITH HANDFUL OF VIGORO. SET PLANT IN HOLE SO THAT TOP OF BALL IS EVEN WITH THE GROUND. FILL HALF OF THE HOLE AROUND PLANT WITH PEAT MOSS AND SOIL AND LITTLE VIGORO, PACK SOLID. NOW POUR A COUPLE OF BUCKETS OF WATER IN HOLE AND ALLOW TO SETTLE. FINISH FILLING HOLE WITH MIXTURE AND ADD 2 OR 3 INCHES OF PEAT MOSS OR LEAF MOLD ON TOP OF GROUND TO INSURE MOISTURE FOR TOP FEEDER ROOTS. SPRINKLE TOP OF GROUND WELL WHEN FINISHED.

(See inside back cover for further helpful suggestions on planting)

CAMELLIAS

The most beautiful of all the broadleaved evergreen blooming plants. Longlived and more beautiful and valuable with age. Selected varieties offer a long season of bloom, In our climate in Portland they bloom from January to May. In mild winters they start in October.

The Camellia's popularity is growing every year. Many new introductions have been introduced to the flower world the last few years to keep the collectors of this lovely shrub interested and busy.

Even amateur gardeners can grow Camellias as they are not difficult to grow. Follow our planting guide for best results.

Camellias are less subject to disease and insects than most shrubs. If scale or aphids attack the leaves this can be easily remedied by spraying tops of leaves and under leaves with Volck, using 1 part Volck to 50 parts water. Always keep weevil bait in your garden as the weevil is an enemy to almost all flowers and shrubs.

Plant Camellias in your yard and enjoy the beauty of the most beautiful evergreen shrub. Cut blooms from your own bushes of lovely, long lasting corsages and also for glamorous table decorations.

Camellias used for hedges are beautiful as well as practical. They save time and money due to the very small amount of pruning needed to keep them in shape. The habit of their growth determines the best variety to use. There are varieties suitable for the tall narrow hedge, for the wide short hedge, etc. We will be happy to help you make selections for best results.

Visit Our Nursery from December to the End of May to See

Camellias in Bloom

CAMELLIAS AS HOUSE PLANTS

Camellias will thrive and flourish if a cool room which is well lighted by windows can be provided for them, such as a glass enclosed porch, sun porch, or the like. Temperatures should not exceed 55 degrees F or fall below 35 degrees F during the winter months. To maintain a high humidity in the room keep jars of water around. Soil, one part good garden soil to one part peat moss. Fertilizer, 1 tablespoon Vigoro to 1 quart water. Use application in December, a second in February when new growth is beginning and another in April for new growth and bud development. Water: keep moist at all times. Foliage and buds should be sprayed with water at least 4 or 5 times a week, except when in flower. During the summer months plants are placed outdoors in semi-shaded areas. Bury pots in ground so the roots do not dry out. The proper time to repot Camellias, should it become necessary is immediately after flowering. Always allow a good drainage with sand in the bottom of the pot. Grown in this manner Camellias are lovely house plants. Azaleas and Rhododendrons can also be grown in this same way.

Below is a list of the 11 best varieties of Camellias to grow in pots. This list is, of course, for the beginner who has never tried raising Camellias in this manner.

GRANDIFLORA ROSEA

MONJISU

MATHOTIANA ALBA

DAYBREAK

KUMASAKA

VALTAHUREDA

PINK PERFECTION

JULIA DRAYTON

DAIKAGURA

CHANDLERI ELEGANS

MIKENJAKU

Special Camellias

*** **MRS. DOROTHY VAN DER BOM**—Our own seedling. Light red single 4 to 5 inch bloom. Frilled edges, predominate yellow stamens of bright yellow in a round circle. Stamens are very short. Beautiful dark green foliage. Has one of the largest leaves of any variety. Very fast grower. Blooms February to April.

8 to 12 inch	\$ 5.00
12 to 15 inch	\$ 6.00
15 to 18 inch	\$ 7.00
18 to 24 inch	\$ 8.00
24 to 30 inch	\$12.00
30 to 36 inch	\$15.00

*** **RETICULATA**—Pink carmine, semi-double with short bunch of golden stamens. Size of bloom is 6 to 8 inches across. Finest of all Camellias. The color is so different and beautiful everyone is spellbound when they see it. The foliage is thick and light green. The bark of tree is almost white or a pale tan. Grafts

18 inch	\$10.00
18 to 30 inch	\$15.00

MRS. BERTHA HARMS—Turning to white. 5 to 7 inch flower of very pale pink, long yellow stamens. Very hardy, late bloomer, (Sizes 1, 2,3,4,5).

KINGYO-TSUBAKI—Very rare. Fish-tail leaved. Semi-double rose red with yellow stamens. This variety is outstanding for its foliage. Leaves all resemble a fan-tailed gold fish, M. (Sizes 1,2,3,4)

BERNICE BODDY—Semi-double pale pink. Outside petals fade to almost white. (Sizes 1,2,3,4)

JENNIE JONES—Semi-double white, yellow stamens. Deep green foliage. (Sizes 1,2)

ESPALIER TRAINED CAMELLIAS

We grow these especially for locations where a wide, bushy growing shrub would be in the way or take up too much room, such as between the house and a walk that has only 2 feet of planting space. Also for around patios, garages, etc. We grow them in all shapes, sizes, forms and varieties. We do not have a large stock of these plants as one Camellia out of 100 is shaped right for this purpose.

\$15.00 and \$25.00

TREE FORM CAMELLIAS

GRAFTED HIGH UP ON THE STEM so that branches hang down like weeping cherry tree. This gives the appearance of an umbrella. These are fine to use as entrance pieces planted in tubs, urns or in the ground. Limited stock.

\$15.00 and \$25.00

WORLD'S WONDER CAMELLIA

One six-foot Camellia grafted with over 100 varieties on one plant which blooms three seasons of the year, fall, winter and spring. This bush starts to bloom in October and blooms until the end of May. Truly a sight to see when in bloom.

PRICE: \$1,000.00

CAMELLIAS (Class B)

- ALOHA or LADY ALICE or ARAJISHI**—Bright red peony-form, resembles carnation; very early bloomer, sometimes in winter. E. (1).
- AMABILIS**—Single white, predominant yellow stamens.
- ABUDANCE**—White loose peony form, medium, sized bloom. M.
- ANNE LINDBERG**—Large salmon-pink loose peony center of petaloids. M. 1950 camellia show winner.
- ANNE SCHWABBE**—Have not seen it bloom. M.
- APPLEBLOSSOM**—Single pale pink, sometimes fragrant, M.
- ASPASIA or VARIEGATED EMPEROR OF RUSSIA**—Peony form of deep red with spots, stamens in five different places. M.
- AUGUSTA WILSON**—Peony flowered deep pink three to four-inch bloom. M.
- ABBIE WILDER**—Peony form pink with white.
- ADMIRATION**—Loose peony form. Red marbled white.
- AMERICAN BEAUTY**—Double red. M.
- ANNA MARIE HOVEY**—Carmine with white stripes. Flat double and peony type on same bush.
- BLACK PRINCE**—Very dark shiny red, semi-double, with few stamens, M.
- BESSIE McARTHUR**—Large semi-double deep pink has three or four layers of petals and petaloids mixed.
- BLOOD OF CHINA or VITTORIO EMANUELE**—Large red lovely peony type, sturdy grower, L.
- CALIFORNIA**—Single to semi-double bloom of rose-pink, broad and long petals.
- COLLETTI MACULATA**—Peony form, red with white blotches.
- CAPRICE**—Lovely semi-double, high center white, stamens and petals intermingled, M. (3,4,5)
- CHANDLERI ELEGANS**—Rose-pink, peony center, very large bloom, loose grower, sometimes has white spots. M.
- CHURCH PINK**—Loose peony pink. M.
- CHRISTINE LEE**—Semi-double, rose-pink, long yellow stamens, M.
- CGL. FIREY or MISSISSIPPI HASTI or C. M. HOVEY**—Large flat double red, perfect form, brilliant, M.
- CONFLAGRATION**—Large semi-double bright red. Stamens and petaloids mixed.
- CANDIDISSIMA or STAR WHITE**—Pure white, arrangement of petals resembles a star as all petals come to a point. L.
- COUNTESS DEVANSITTART or LADY VANSITTART**—Semi-double, cherry red, yellow stamens predominant, heavy bloomer, M.
- DAISY BANKS**—Large. Varied in form, pure white; tissue paper like.
- DAITARIN**—Large single pink, predominant yellow stamens and feather-like petaloids in center. This is one of the most unusual and beautiful.
- DAINTY**—Double white. Latest bloomer among the white. L. (2,3,6)
- DUC DE ORLEANS**—Peony formed center, white with red stripes. M. (5)
- DAIKAGURA**—Large rose blotched white, loose peony form, very nice. This variety is the first to bloom, sometimes blooming at Thanksgiving. E.
- DANIELS FLUFFY**—New seedling. Cherry red, peony type, dotted white. Different.
- DAVID GERBING**—Loose peony formed carmine rose.
- DERBYANA**—Semi-double peony form of deep rose.
- DUNCAN BELL**—Peony formed red. 5 to 6 inch blooms; fast grower.
- DEBUTANTE or SARA C. HASTI**—Pale pink peony form, very beautiful, E.
- ELLA DRAYTON**—Free blooming, large flat double red, lovely for cut flowers, M.
- EMPEROR OF RUSSIA**—Bright red peony type of five centers with stamens in each center, very lovely, M.

CAMELLIAS (Class B)

ENGLISH APPLEBLOSSOM—Large semi-double white, yellow stamens, opens like water lily. M.

ELEANOR OF FAIROAKS—Peony type of deep red marbled white. M.

EL TRAMONTO—Large flat double pink marbled with white. M.

EUGENE LIZZIE—Semi-double rose with markings. Blooms vary in formation.

ENRICO BETTONI—Large bloom of translucent pink. Semi-double to double.

ELIZABETH WHITE—Large double white, lovely. Double white, pink stripe, E.

ECSTASY—Large 3 to 4-inch blooms of rose color with white tip, its habit of growth makes it a lovely bush for a flower bed, M.

ELENA NOBILE—Double red, very vivid, Long season bloomer, M.

FANNY BOLIS—Semi-double red, blotched white, yellow stamens mixed with petals, M.

FEASTI—Imbricated white with pink markings often solid pink, very nice.

FINLANDIA—Semi-double white with long stamens, 4-inch bloom. One of the finest white. M.

FINLANDIA PINK—Semi-double pink with yellow stamens, large bloom. M.

FINLANDIA VARIEGATED—Same as the White Finlandia except this one has pink stripes, very delicate and lovely for corsage. M.

FLEURS DE RENAISSANCE—Semi-double red, M.

GIGANTEA ALBA—Pure white, five petals that lie flat with a large circle of stamens, grand bloom, L.

GOSHOGURUMA—Single deep red, dense cluster of petals and golden stamens in center, very fine and very late heavy bloomer, M. (1 to 6)

grandiflora rosea or **EMPRESS**

GRANDIFLORA ROSEA or **EMPRESS**—Extremely large bloom of a beautiful pink semi-double form with

long yellow stamens in center and sometimes a peony center of petaloids. 5 to 6-inch. blooms. This variety blooms sometimes in January and blooms until April. Picked as winner at 1944 Portland Camellia Show.

HARLEQUIN—Very large peony form of pink and white, some blooms on bush are solid color, M.

HELEN OF TROY or **H.A. DOWNING**—Semi-double deep rosy red with long yellow stamens, petals twist but lay outward, L.

HOYIHOKU—Single white, peony center.

HERME—Large semi-double rose with red stripes and a pale pink border on each petal, sometimes fragrant, M.

JULIA DRAYTON—Very large double red, has purplish color when bloom gets older. One of the nicest. Picked as winner of 1945 Portland Camellia Show, M.

KIMBERLY—Five petals of bright shiny red with a pin cushion center of yellow stamens in center, M.

KUMASAKA—Double salmon pink, sometimes shows stamens, this variety also has peony formed flowers on same bush, very heavy bloomer, and very hardy; blooms young, L.

KING LEAR—Semi-double cherry-red mottled white, very odd stamens, rare, A.

LADY MARY CROMARTIE—Large semi-double to loose peony form of deep rosy red, very predominant stamens mingled with center ruffled petals, M.

LADY DE SANQUINAE—Semi-double pink with occasional red stripe, yellow stamens in center, M.

MAGNOLIAEFLOA or **ROSE OF DAWN**—Pale pink semi-double 4 inch bloom. Yellow stamens in center. One of the loveliest. Picked as winner at 1947 Camellia Show, M.

MAGNOLIAEFLOA ALBA—Semi-double pure white with yellow stamens. Petals are long and narrow. Bloom is cup shape. Large bloom. M.

CAMELLIAS (Class B)

- MATHOTIANA ALBA** or **BLOOD OF CHRIST**—Very large pure white double. One pink stripe on every bloom. Petals curve backwards, L.
- MONARCH**—Peony type flower of deep pink often spotted with white. Blossoms often measure 6 inches, M. (1)
- MONJISHU RED**—Bright red semi-double, yellow stamens. Very showy. Dwarf, bushy grower. Very lovely for low plantings, L.
- MONJISHU VARIEGATED**—Same as above. This one is marbled with white, L.
- MARCHIONESS OR EXETER**—Deep pink peony formed flowers. Very large blooms, M.
- MARGARET HIGDON**—Loose peony form with stamens mingled with center petals, rose-red color with margin of white, M.
- MARY E. M.**—Semi-double large salmon pink, M.
- MARION MITCHELL**—Very large semi-double scarlet red, sometimes petaloids and stamens intermingled, M.
- MATHOTIANA RUBRA**—Dark red velvet like double formed bloom, medium sized bloom, M.
- MENA LADNIER**—Brilliant red, loose flat outer petals, center of flower clustered with petals and petaloids. Often throws white markings, E.
- MONARCH**—Peony type flower of deep pink often spotted with white. Blossoms often measure 6 inches, M.
- MYKENJAKU**—Large bloom of rose with white splotches. Semi-double form. Truly a beauty. Picked as winner in 1946 Camellia Show, E.M.
- MARGURITA COLEONIS**—Double crimson splashed with white.
- MRS. LOUISE WALKER**—Our own seedling, Semi-double pink. Weeping type grower, M.
- MRS. WM. THOMPSON**—Large semi-double blush fading to white with yellow stamens in center, lovely, E.
- MADAME INGRAD**—Our own seedling, semi-double white, yellow stamens in center. Because of its weeping habit would be lovely in rock garden or beside a pool, M.
- OTOME-PINK**—Pale double pink flat bloom, good bloomer, M.
- PRINCE ALBERT** or **CONCORDIA**—Pink with red stripes, loose peony form type, heavy bloomer, M.
- PROFESSOR SARGENT**—Bright red layer of flat petals with pom-pom center, M.
- PAEONIAEFLORA**—Extremely large with pom-pom center, white with pink fleck, E.
- PANACHE**—Large double pink. Pale pink on inside of bloom and paler pink on edge of petals, E.
- PINE CONE** or **MATSUKASA**—Semi-double pine cone shaped. Rose marbled with white, M.
- PINK BEAUTY**—Large deep pink double, petals recurve under; lovely, L.
- PINK BALL**—Pompon centered type of pale pink, M.
- POPE PIUS IX** or **CARLOTTA GRISSI**—Very hardy large double red sometimes with white fleck, M.
- PRINCESS BACHINACHI**—Bright double red with pure white blotches. Keeps bud center for long time, L.
- PERFECTION ALBA**—Creamish double white. Looks like Gardenia. M. (1,2,3,4)
- PEARL OF CHINA**—Single pale pink. Blue-green foliage. Slow, compact grower, M. (1,2,3,4,5)
- PRIDE OF PORTLAND**—Our own sport from the Red Waukanoura. Semi-double bright red with pure white splotches, very heavy bloomer and a bushy upright grower. One of the favorites of our Nursery visitors, M.
- PRINCESS NAGASKIE**—Semi-double rose-pink with white blotches. Yellow stamens in center. Variegated foliage, M. (4,5,6)
- RAINY SUN**—Single red, yellow stamens, E. (1,2,3)

CAMELLIAS (Class B)

- ROSEA SUPERBA**—Flat double red, derful color, L.
M. (1,2)
- REV. J. BENNETT**—Large semi-double salmon pink with pale lighter markings of almost white in the throat. (1,2,3,4)
- SOUV. DE BAHAUD LITOU**—Pale pink flat double. White edges on petals. Petals curve backwards, L.
- STARDUST**—Dark pink peony type, stamens mixed in clusters in bloom, M.
- QUEEN OF HEARTS**—Semi-double white with pink stripes. Some blooms are pale blush. Some are solid white, L. (1,2,3,4)
- SNOWDRIFT**—Semi-double snowy white with yellow stamens.
- TE DEUM**—Enormous peony formed dark red, velvet-like texture, won-
- UNCLE SAM**—A large flat double red, like dahlia.
- VALTAVAREDA**—Large double pink fading to lighter pink in center, M.
- VARIABILIS**—Semi-double with pompon center. White with pink flecks, pink with white flecks. Solid white and solid pink all on same bush. Lovely, M.
- WATERLOO**—Semi-double white with loose peony center of petaloids, tissue paper-like large bloom, E.M.
- WAUKANOURA WHITE**—Semi-double white with long yellow stamens. Very profuse bloomer. Bushy grower, M.
- WARRATAH RED**—Bright red single with pom-pom center, E.

CLASS C CAMELLIAS

- AMABILIS VARIEGATED**—Single white with pink stripes, predominant yellow stamens, M. (1,3)
- ANNA MARIE HOVEY**—Carmine with white stripes. Flat double and peony type on same bush.
- AUBURN WHITE**—Semi-double blush, fading to pure white, with long yellow stamens. Cup shape bloom. New variety, L.
- ADMIRAL NIMITZ**—Newer seedling. Large pink, occasional white fleck. Double.
- BARONNE VON BLEICHROEDE R**—Newer seedling. Double. Small white, splotted red, E.
- CHRISTMAS GLORY**—Single pink with predominant yellow stamens. Very early bloom.
- CASABLANCA**—Double pale pink softly marked with white, tufted center of stamens.
- CAPT. MARTIN'S FAVORITE**—Double rose red with white markings. Small bloom.
- DAYBREAK**—Pale pink peony form, good bloomer. Lovely, M.
- DONKLARRI ENGLISH**—Semi-double rose with white splotes, yellow

CAMELLIAS (Class C)

- stamens in center. 4 to 6 inch bloom. M.
- DORI McCARTER**—Large single white, yellow stamens, M.
- DR. LEE**—Semi-double bright red. Very thick petals. Very large bloom. Profuse bloomer. Sometimes is marbled with white, M.
- DUCHESS OF WINDSOR**—Newer seedling. No description.
- EDITH CHURCHWELL**—Description unknown.
- ELEANOR HAGOOD**—Pale double pink. Center fades to white, L.
- ELIZABETH ARDEN**—Double white striped and dotted pink.
- ELEANOR FRANCHETTI**—Large peony white with pink stripes. Vigorous grower, M.
- ELIZABETH BOARDMAN**—Semi-double satiny white, irregular form with yellow stamens interspersed. Lovely, M.
- EMPEROR WILHELM, THE EMPEROR**—One of the most spectacular Camellias. Very large semi-double red with white blotches. Peony center of petaloids and stamens. Large leaves, loose flower. 1952 Portland Camellia Show winner, M.
- FIMBRIATA SUPERBA** or **FRED SANDERS**—This is a spectacular Camellia. The build of a ruffled *Petunia* in a soft red with serrated edges. Petals are leather-like, M.L.
- FINLANDIA PINK F.N.** or **ROSARY**—Semi-double pink with yellow stamens. Large blooms. New seedling, M.
- FLAME**—Flame color or orange red semi-double cup shaped with yellow stamens. Most outstanding in color. Extremely heavy bloomer, M.
- GLEN 40**—Full double scarlet, very large bloom. Resembles a Dahlia, M.
- IMURA**—Semi-double pure white with long yellow stamens. Petals are long and narrow. Looks like Water Lily, M.
- LOTUS**—The largest bloom of all the whites. Semi-double tissue paper-like white with yellow stamens. 6 inch blooms. 1948 winner at Portland Camellia show, M.
- MRS. FREEMAN WEISS**—Very new. Semi-double pink, loose construction of wavy petals and petaloids mixed with yellow stamens.
- MRS. LUERMAN**—Vivid red with white. Double.
- MRS. MILLER WILSON**—Description unknown.
- MRS. BALDWIN WOOD**—New seedling. White semi-double. Peony center of petaloids.
- MRS. CHAS. COBB**—Coppery bronze, loose peony form. Stamens mixed throughout flower. Very good, E.
- MRS. CHAS. SIMONS**—Large semi-double white, loose constructions. Stamens and petaloids in center. Lovely, M.
- MRS. TANNERS RED**—1 to 2 inch bloom of red. Cute.
- MADAM CHIANG KAI-SHEK**—Large semi-double deep rose often flecked with white. Stamens predominant.
- PRINCE OF WALES**—New seedling. Description unknown.
- PINK POPPY**—Pale pink single bloom with circle of yellow. Short stamens and petaloids.
- PINK STAR**—Pale pink peony form. Heavy bloomer.
- PRESIDENT LINCOLN**—Very new. Bright red semi-double with loose peony center, M.
- QUEEN BESSIE**—Semi-double white with faint blushes at center. Large wavy petals. Very large bloom.
- REGINA DE GIGANTI**—Loose semi-double crystal pink, M.
- RISING SUN**—Brilliant red single with bright yellow stamens in center. Very large bloom.
- ROSE GLORY**—Single rose with circle of yellow stamens, E.
- ROOSEVELT BLUES**—Semi-double with loose peony form of petals and petaloids in center. Red, which changes to blue as bloom gets older. Very new and rare.

CAMELLIAS (Class C)

SILVER MOON—Large flat double white. New and rare.

-SURPRISE—Pink with deeper pink stripes. Peony form.

TEUTONIA—Pale double pink. Center darker pink.

TRIPHOSA—Single, enormous pure white. Circle of yellow stamens. Large petals.

VILLE DE NANTES—This is one of the outstanding Camellias. Bright flame red, long oblong shape, semi-double with yellow stamens. Petals are folded and stand up in the middle like an Orchid. The edges are finely serrated as though they had been trimmed with pinking shears.

There is no other Camellia like this one and every Camellia lover should be sure to have it. 1951 Portland Camellia show winner.

VILLE DE NANTES VARIEGATED—Same as red with exception of white spots.

WHITE CRANE or HAKU RAKUTEN—Large semi-double pure white with petaloids and yellow stamens, M.

WM. PENN—Varies in form from full peony to single with pompon center. Colors are from deepest red and white to a purplish-red. Beautiful foliage. Serrated leaves. Look like they have been pinked with pinking shears.

SASANQUA CAMELLIAS

The Sasanqua Camellia has very small leaves and flowers. Blooms in the fall and early spring. They are evergreen and are wonderful in landscapes or for hedges. Good to grow as an Espalier, too. They are very slow growing so can be used in places where other shrubs would grow too large. Good for use beside a pool, especially the White Dove Sasanqua.

Size 1-10 to 12 inch	\$2.50
Size 2-12 to 15 inch	\$3.50
Size 3-15 to 18 inch	\$4.50
Size 4-18 to 24 inch	\$6.00
Size 5-24 to 30 inch	\$7.50

BUTTERFLY—Semi-double white with deep pink border on each petal.

CRIMSON KING—Fuchsia red, semi-double.

CRIMSON VELVET—Semi-double red.

HIRYO—Semi-double Fuchsia red.

GRANDIFLORA ALBA—Double white.

WHITE DOVE—Semidouble white. Weeping habit grower.

SASANQUA ROSEA—Single rose.

HEATHERS

Field grown, low dwarf evergreen growing varieties. Fine for use in borders, window boxes, urns, rockeries, etc. Prune heathers once a year after they are through blooming.

4 to 6 inch . . . 50¢ *"Plant Heathers for Year Around Bloom"* 6 to 9 inch . . . 75¢

CINEREA—Dark purple, early to late summer.

C. W. EASTON—Red, early to late summer.

COUNTY WICKLOW—Double pink, late summer and fall.

TETRALEX PINK—Pink, late summer and fall.

SPRINGWOOD—White, winter and spring.

GOLDEN LEAF HEATHER—Lavender blooms, summer and late fall.

HAMILTON—Double pink blooms, early summer.

MRS. H. E. BEALE—Double pink blossoms, long spikes of blooms. Good for dried flower. Late summer.

MAXWELL—Dark rose blooms, early summer.

MEDITERRANEAN—Double pink blooms. Winter and spring.

RHODODENDRONS

A lovely, hardy broadleaved evergreen with beautiful flowers of many different colors to select from. They are native to our Northwest and are world known for their great beauty. They are easy to grow and do well in climates which do not get too cold. Check our planting guide for best results in growing. By planting the early, midseason and late blooming varieties you can have a long season of beauty. They follow the Camellia in their blooming season, so by using both of them in your landscape you can have months of blooming color in your yard besides having the evergreen foliage to look at the year around.

In hot summer climates plants prefer afternoon shade and water on foliage during long, dry spells.

All of the Rhododendrons withstood 9⁰ below zero in Portland three winters ago with only damage to the flower buds on some varieties. Many of the hardy varieties came through 20⁰ zero in a nearby town.

Stars (*) denote classification of plants by the Rhododendron society. Four stars being the highest rating.

The letters A, B or C in back of each variety denotes classification as to best planting location.

A—Can stand sun. Very hardy.

B—Needs partial afternoon shade. Very hardy.

C—Needs partial afternoon shade. Hardy only in mild winters.

10% off on 10 plants or over; 15% off on 25 plants or over

Size No. 1—10 to 12 in.	\$3.25
Size No. 2—12 to 15 in.	\$4.00
Size No. 3—15 to 18 in.	\$5.00
Size No. 4—18 to 24 in.	\$6.50
Size No. 5—24 to 30 in.	\$8.00

GROUP I

**

ALICE—Deep pink, fading to rose. Compact, midseason blooms. (Sizes 1,2,3,4.) B.

**

BAGSHOT RUBY—Blood crimson, midseason to late. All Sizes, B.

**

COUNTESS OF DERBY or **EUREKA MAID**—Rose pink, bushy. Midseason. (Sizes 1,2,3,4.) B.

**

C. B. VAN NESS—Dark scarlet, vigorous, late. All Sizes, C.

*

CYNTHIA—Rosy crimson, cone shape, vigorous, midseason. All Sizes, B.

**

FASTUOSUM FLORE PLENO—Deep

lavender, tufted center. Midseason. All Sizes, A.

**

GOMER WATERER—White, tinted edge of lavender. Bushy, late. (Sizes 1,2,3,4.) A.

JOHN WALTER—Crimson. All Sizes, A.

LADY CLEMENTINA WALSH—Blush, edged white, yellow eye. Bushy. Late. (Sizes 1,2,3) B.

**

LANGLEY PARK—Deep red, compact, midseason. (Sizes 1,2,3,4.) B.

LORD ROBERTS—Dark red, black spots, bushy. Late. (Sizes 1,2,3) A.

*

LOUIS PASTEUR—Pink, lighter center. (Sizes 1,2.) B.

RHODODENDRONS

**

MADAM DE BRUIN—Cerise red, bushy, midseason. All Sizes, B.

MADAM GUILLEMONT—Rose pink, deeper center. All Sizes, B.

MADAME MASSON—White, yellow blotch. Midseason. (Sizes 1,2,3.)

MICHAEL WATERER—Bright red, compact, midseason. (Sizes 2,3,4.) B.

**

MRS. A. T. DE LA MARE—White with green spot. Vigorous, midseason. Late. (Sizes 1,2,3.) A.

MRS. JOHN WATERER—Rosy crimson. All Sizes, C.

**

MRS. MARY ASHLEY—Salmon pink, shaded cream. Bushy, midseason. (Size 1.) B.

*

MRS. R. S. HOLFORD—Rosy Salmon. All Sizes, B.

*

PINK BEAUTY—Pink. (Size 4,5) C.

**

PINK PEARL—Rose pink, fading to blush. Very large blooms. Vigorous. Midseason. All Sizes, B.

*

PROFESSOR J. H. ZAAYER—Good red. (Sizes 1,2,3.) B.

**

TRILBY—Deep crimson. Midseason. Vigorous. All Sizes, B.

GROUP II

Size 1-10 to 12 inch	\$ 4.50
Size 2-12 to 15 inch	\$ 5.50
Size 3-15 to 18 inch	\$ 6.50

GOLDSWORTH—Yellow, apricot (Sizes 2,3.) B.

RHODODENDRONS

IMPEDITUM—Very dwarf. Deep blue. Lovely. (Size 1.)

JEAN MARY MONTAGUE—Bright scarlet, compact, late. Wonderful, (Sizes 2,3,4,5.)

KEWIR—Pale pink, Large blooms in early spring. (Sizes 1,2.) B.

**

KING GEORGE—Bright red. Vigorous. Early. (Size 4.) C.

LADY BESSBOROUGH—Pale yellow (Sizes 2,3.) B.

LODERI KING GEORGE—Enormous white truss. One of the loveliest whites. Vigorous, midseason. (Sizes 1,2,3,4,5.) C.

PURPLE SPLENDOR—Deep purple, brown blotch in center. Only one of its color. Bushy, midseason. (Sizes 1,2,3,4.) B.

**

PYGMALION—Crimson scarlet, black spot. Lovely, vigorous. (Sizes 1,2.) B.

*

SAPPHO—White, heavily spotted. (Sizes 1,2,3.) A.

ROMANY CHAI—New, no rating yet. Velvety deep scarlet. Bushy, late. (Sizes 1,2,3,4.)

SHANGLEREA—New, no rating yet. Variegated red. Unusual. (Sizes 2,3.)

MARGARET DUNN—(Sizes 1,2.)

MARS—Deep red, compact, early. (Sizes 1,2,3.) B.

MAY DAY—Deep orange red, long bells. Slow, bushy. (Sizes 1,2,3.) B.

MRS. FURNIVAL—Low growing dark green foliage, striking light pink flowers with a sienna blotch in late May or early June. (Size 1.) B.

MRS. G. W. LEAK—Deep pink, purple blotch. One of the loveliest early bloomers. Vigorous. All Sizes, C.

**

MRS. C. H. PEARSON—Burnt sienna spotted pale pink. (Sizes 2,3.) B.

SOUV. OF W. C. SLOCOCK—Primrose yellow, bushy, late. (Sizes 2, 3.) B.

TALLYHO—Scarlet, vigorous. Very late. (Size 3.) C.

UNIQUE—Waxy yellow, compact. Midseason. (Sizes 1,2,3.) B.

VULCAN—Brick-red, fine bloomer, late midseason. (Sizes 1,2,3,4.)

WHITE SWAN—Delicate pink fading to pure white. (Sizes 1,2,3,4.) B.

RHODODENDRON SEEDLINGS

Rhododendron Seedlings, hybridized from choice varieties of colors which may develop into all different colors, red, pink, white and lavender. Some of the new varieties which will develop from this seed may be named.

6 to 8 inch	\$.75; 10 plants \$ 6.00
8 to 12 inch	\$1.00; 10 plants \$ 8.00
10 to 12 inch	\$1.50; 10 plants \$12.00

AZALEAS

Azaleas are fine plants for use in borders as well as single plantings in landscapes. They are wonderfully colorful when in bloom, and also their foliage adds color in the fall. They start to bloom after the Camellia season and many varieties bloom long after the Rhododendrons are through. By using the different varieties of Azaleas you will have a long blooming season. Because of their slow growing habit they can be used prominently for landscaping. Make your home outstanding with modern, beautiful blooming evergreen shrubs.

HARDINESS RATING

H-1 (Hardy to 25 degrees F. below zero) H-3 (Hardy to 5 degrees F. below zero)
H-2 (Hardy to 15 degrees F. below zero) H-4 (Hardy to 5 degrees F. above zero)

Low growing evergreen hardy varieties.

4 to 6 in. spread \$.75
6 to 8 in. spread \$1.00
8 to 10 in. spread \$1.50

HINODEGIRI—Single red. Low bushy grower. First Azalea to bloom. Have 1st two sizes. (H-4)

HEXE—Red double. Blooms after the Hinodegiri. Have all sizes. (H-4)

LATIFOLIA ALBA—Large white, late. Have 1st two sizes. (H-4)

DARK PURPLE—Single purple. Midseason. Have 1st two sizes. (H-3)

WARD'S RUBY—Dark ruby red. Does not fade. Long lasting bloom. New and very beautiful. Early. Have all sizes. (H-4)

PINK PEARL—Pale blush single.

Midseason bloom. Have 1st two sizes. (H-4)

SWEETHEART SUPREME—Pink with deeper flecks of rose. Large, summer blooms. Have 1st two sizes. (H-4)

ROSEA FLORA—Double salmon pink, rose type, very dwarf and bushy. Blooms after all of the above varieties. Very long lasting blooms. Wonderful for borders. Have all sizes. (H-4)

MACRANTHA—Pink, deeper pink stripe. Late summer. Have 1st two sizes. (H-1)

"SPECIAL, NEW AZALEAS"

We are listing for the first time 4 new varieties.
These Azaleas are noted for their lovely flowers but
most of all for their hardiness, having withstood
temperatures of 20 degrees below zero.

12 to 15" \$2.50

ANNY—Orange-red. Midseason (H-1)

BETTY—Brilliant rose-pink. Midseason (H-2)

OTHELLO—Brick Red. Earlier than Anny. (H-1)

FEDORA—Large Salmon-rose. Midseason (H-1)

BUSH FORM AZALEAS

AZALEAS ALTA CLARENSIS—Burnt orange, fragrant. Very lovely, field grown. Grow into lovely bushes from 3 to 4 feet tall. Bloom in the spring with very large showy clusters. Also beautiful for fall foliage. (H-2)

6 to 8"—\$.75 or 6 for \$3.50
8 to 10"—\$1.00 or 6 for \$5.00
18 to 24" Budded \$3.50

AZALEA MOLLIS—Flame orange, salmon pink, yellow, red. Plant in sunny location. Very Hardy. (H-2)

6 to 8"—\$.75 or 6 for \$3.50
8 to 10"—\$1.00 or 6 for \$5.00

OTHER BLOOMING SHRUBS

DAPHNE

Daphne Odora—Very fragrant pink blossoms in early spring. Round bush form.

6 to 8 in. tall	\$.50
10 to 12 in. tall	\$1.50
12 to 15 in. spread	\$2.25
15 to 18 in. spread	\$3.00
18 to 24 in. spread	\$4.00
24 to 30 in. spread	\$5.00

ANDROMEDA

Andromeda—White blooms like Lily of the Valley. Hangs in clusters like grapes. Blooms early spring.

6 to 8 in. tall	\$.75
---------------------------	--------

JAPANESE MAPLES

Bright red cut leafed foliage from early spring to fall. Dwarf growing, very graceful, weeping branches.

10 to 15" height	\$ 4.50
15 to 18" height	\$ 5.50
18 to 24" height	\$ 7.50
24 to 30" height	\$10.00 to \$12.50
depending on spread of bush.	
30 to 36" height	\$15.00 to \$18.00
depending on spread of bush.	

Bright red leaves in early spring to late fall. Upright fast growing.

10 to 15" height	\$ 3.50
15 to 18" height	\$ 4.50
18 to 24" height	\$ 6.50
24 to 30" height	\$ 8.00 to \$10.00
depending on spread of bush	
30 to 36" height	\$17.50

EMPRESS TREE

Very fast growing shade tree with oriental appearance. Long clusters of very fragrant blue flowers which bloom in the summer. Most outstanding leaves of any tree I have ever seen. We measured leaves which were 18 to 24" across and were of a very dark green color. Will grow in either shade or sun.

5 to 6'	\$ 3.50
6 to 7'	\$ 4.50
7 to 8'	\$ 7.00
8 to 9'	\$ 8.00
9 to 12"	\$10.00

PERNETTYA

White bell flowers in summer which develop berries in the early fall that last through the winter and early spring.

8 to 10" height	\$1.25	5 plants \$5.00
---------------------------	--------	-----------------

White Berries

Dark Black Red Berries

Pink Berries

Cherry Red Berries

We have a few plants of the White Berried and the Pink Berried plants in 12 to 18" size that are loaded with berries. Price \$3.50

CLEMATIS VINES

The beauty of this climbing plant has been overlooked by the average landscape planter. They are equally as lovely if grown on a trellis or kept tied to a pole. By planting several of the varieties you are assured of a constant blooming season from early spring to late fall. A sweet, loamy soil is preferred. Can be planted in direct sun as long as the roots are shaded. Very hardy.

Armandi—Long narrow dark green leaves, very thick. Evergreen. Fragrant white flowers in early spring. Rare, 2 year old \$2.50

1 year old	\$ 1.00	6 plants \$ 5.00
2 year old	\$ 2.50	6 plants \$12.50

BLUE LAWSONIANA—Large pale blue flowers in early summer. 1 year and 2 year plants.

HENRYI—White flowers in early summer. 1 year plants only.

JACKMANNI—Dark purple flowers in early summer. 1 year plants.

LADY BETTY BALFOUR—Large dark purple flowers in early summer. 1 year plants.

MADAM E. ANDRE—Dark red flowers

in early summer. 1 year plants.

MONTANA PINK—Small delicate pink flowers in late spring. Fast-grower and terrific bloomer. 1 year and 2 year plants.

RAMONA—Large blue flowers in early summer. Fast grower. 1 and 2 year plants.

NELLIE MOSSIER—Pink with deep pink stripes on petals. Early spring blooms. 1 and 2 year plants.

SUGGESTIONS ON PLANTING

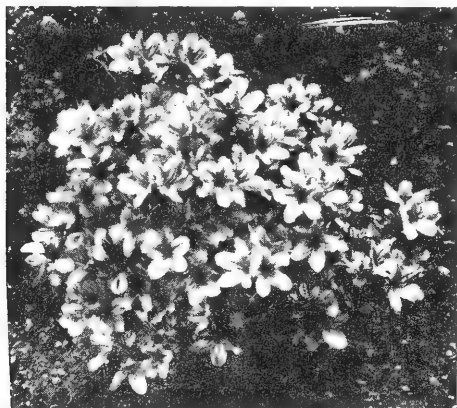

Camellias, Azaleas and Rhododendrons are three of the choicest shrubs that are used in landscapes. They are all evergreen blooming plants. The Camellias bloom first and before they are through blooming the Azaleas start to bloom and the Rhododendrons follow on through, which gives a long season of blooms. The Mollis Azalea loses its leaves in the winter so should be planted among the evergreen shrubs. The dwarf Heathers also fit in nicely with Camellias, Azaleas and Rhododendrons as they bloom summer, winter, spring and fall. Gardeners that have only a limited time to work in their yards will appreciate all of these plants as there is very little pruning, no transplanting if placed properly to start, and very little if any spraying for insects to do. They are also easy to grow as they all prefer the same type acid, loose peat-moss soil. But one should be very careful not to over-fertilize the Azaleas. A teaspoonful of any acid fertilizer each year is plenty. If your climate is hot and dry no doubt you will have a sweet soil. To produce acid soil epsom salts or aluminum sulphate can be used. About one tea-cup per plant and water in well. They like water on their foliage as they breathe through their leaves, which makes them easy to care for as you can easily turn the sprinkler on them for an hour or so once or twice a week, depending of course on your climate. Never allow soil around plants to dry. The old Camellia and Rhododendron blooms are liable to cause a disease so be sure to keep them picked off from plants and do not allow them to lie on the ground. Dispose of them. Do not use them in compost piles.

If these simple instructions are followed all plants should be thrifty, healthy plants that bloom profusely. They should be a joy to all flower lovers the year around.

Azaleas are very popular wherever grown. Their masses of brilliant blooms enliven spring gardens with a display of beauty that is often breathtaking. The ever-green varieties have attractive foliage throughout the year. The deciduous sorts (*altaclarensis* and *mollis*) are especially valuable for planting in combination with other spring flowers or inter-planting with evergreens of all kinds.

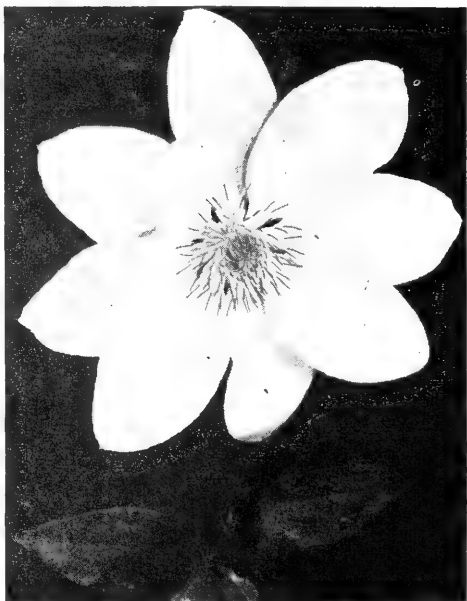

A MOLLIS HYBRID AZALEA

AZALEA HINODEGIRI

Clematis are attractive vines with beautiful large blooms in spring and summer. Use them on fences, trellises and walls.
